## PROFESSIONAL SUMMARY

Software & IT Specialist with experience in full-stack development, network systems, freelance work in software development, writing, and QA; with a proven record in delivering web apps as well as deploying a virtualized home lab.

## EDUCATION

**B.S. in Computer Science, STI College San Jose.** GWA: 90% (1.76/1.00) Graduated: **2026**  
Thesis: "GardenPals: An IoT Based Intelligent Vegetable Garden System" San Jose City, N.E., PH.

**B.S. in Computer Science, Saint Louis University – Baguio.** Dean's Lister **2021-2022**  
Organization: SCHEMA SLU (Official Student Pub. Of SAMCIS) - Staff Writer Baguio City, PH.

## Certifications & Training

- **Cisco Certified Support Technician (CCST)** | Cisco | *in Progress* **in Progress**
- **Cisco Network Technician Learning Path** | Cisco Networking Academy **Aug 2026**
- **Google IT Support Professional Certificate** | Google & Coursera | *Verify* **May 2026**
- **C2 Proficient English Certificate** | EF SET | *Verify* **Mar 2026**

## SKILLS

**Technical Stack:** Java, Python, C++, MySQL, MS SQL, HTML/CSS, PHP, React.js, Node.js, REST APIs, Arduino  
**Networking:** LAN/WAN, TCP/IP, DHCP, DNS, VPN, Ethernet, Cisco Packet Tracer, VirtualBox, Troubleshooting  
**Tools:** GitHub, Active Directory, Docker, Jira, Agile, MS Office 365 (Word, PowerPoint, Excel, Teams), Canva  
**Languages & Writing:** English (Fluent), Filipino & Ilocano (Native), Spanish (Basic), Technical Writing

## EXPERIENCE

**Quality Assurance Tester** | *Freelance* | Remote **Mar 2026 – Present**

- Manually tested core user flows and conducted bug-hunting for Nueva Technologies' HatidGo, a ride and delivery app in the Philippines with over 10,000+ downloads, ensuring a reliable experience for their user base.

**Web Dev & IT Support Intern** | *San Jose City Electric Cooperative* | San Jose City, N.E. **Jan 2026 – Apr 2026**

- Migrated SAJELCO's website a JavaScript, PHP and MySQL stack to a React.js/Node.js stack; transitioning their website to a new platform deployed on GCP to improve service for their approx. 40,000+ consumers.
- An additional role was to fabricate 30+ RJ45 Ethernet cables and maintaining LAN system infrastructure.

**Software Developer & Technical Writer** | *Freelance* | Remote **2024 – Present**

- *Software Development:* Engineered custom web apps using JavaScript, PHP & MySQL, Android mobile applications, and desktop console apps using C# based on varied client specifications and system requirements.
- *Technical Writing:* Authored research papers and technical documentation to fulfill client's specifications.

## PROJECTS

**Home Lab & Network** | Personal | Network Setup, CCTV Setup, VirtualBox, Home Assistant OS

- Configured a multi-floor TP-Link Mesh Wi-Fi setup with our Converge home router, crimped Ethernet cables to a PC for high-speed internet access, and deployed TP-Link Wi-Fi CCTV cameras for full-property coverage.
- Deployed Home Assistant OS on VirtualBox with Bridged Networking to establish direct ICMP ping tracking for core devices across floor areas. It also has a startup shortcut to run the local server silently in the background.

**SAJELCO Website** | Internship | React.js, Node.js, MySQL | *sajelco.net*

- Updated SAJELCO's website from a PHP, MySQL stack to a React.js/Node.js stack effectively transitioning the organization to a new, high-performance platform. It is now deployed on GCP after review by the IT staff.
- Collaborated with the IT team to integrate an improved tech stack improve website speeds and to bridge the gap between development and operational needs to improve their service delivery for approx. 40,000+ consumers.

**R1 Amianan Presyo** | Personal | Python, Pandas, Streamlit | *LiveApp - GitHub*

- Developed an agricultural monitor using Python, which manages live price feeds and data for 5+ commodities across Region I (Ilocos Region). This is providing real-time market data for regional supply chain planners.
